

AMENDMENTS TO THE SPECIFICATION

Please amend the paragraph beginning at page 7, line 6 and ending at page 7, line 14, as follows:

As illustrated in FIGURES 4 and 6, a lower portion of the baserail 52, proximate to the bottom end 60 of the baserail 52, is connected to the bottom rail 40. The bottom rail 40 is best illustrated in FIGURE 6 and is preferably an extrusion formed of a high strength material. The bottom rail 40 has a base 70, a first flange 74 which extends outwardly from the base 70 proximate to a bottom end 68 thereof, and a second flange 76 which extends inwardly from the base 70 proximate to a top end 66 thereof. The first flange 74 extends outwardly from the base 70 a distance which is preferably at least as large as the thickness of the baserail 52. The second flange 76 assists in the connection of the ~~baserail 52~~ bottom rail 40 to the floor 32, which will not be discussed herein as such a connection is well known in the art.
